Brand Core Icon

ClientPoint Core Icon

Say hello to the new ClientPoint icon. Simple, bold, friendly and unique, this icon has the flexibility to be used in a variety of mediums.

ClientPoint®

Primary Logo: The tall version of our logo should always be used. Any exceptions need to be approved by the head of product or head of marketing.

Trademark

The icon will be trademarked and will appear with the TM symbol as shown on lower right side of the letterform.

Secondary Logo: The wide version of our logo should never be used, except for in unique situations that require a wide logo. Each such exception needs to be approved by the head of product or head of marketing.

Ideally: The ClientPoint Brand Icon will be used on white background with a full four Color treatment for maximum impact and clarity. Extra care needs to be taken in web environments where devices may have dark mode enabled. The proliferation of dark mode means that the ClientPoint logo file used must have a white background that extends to full clear space. For complete ClientPoint Brand Icon guidelines view the upcoming pages in this section.
